

Machine Shop/Operations Manager

Reporting to: Managing Director

Working hours: Full Time

Pay: Dependent on Experience

Location: DM Engineering, Workington

About Us:

A specialist Engineering and Manufacturing company delivering high precision components for a wide range of industries, including nuclear and industrial. With extensive in-house CNC machining capabilities, advanced CAD/CAM systems and strong design and fabrication support, we pride ourselves on exceptional quality and service.

Key responsibilities:

- Oversee day to day operations of the CNC Milling, CNC Turning, Grinding and Fabrication.
- Lead and manage a team of machinists.
- Plan, prioritise workflow, ensuring efficient use of CNC machining equipment including lathes, grinding stations and fabrication resources.
- Work closely with the CAD/CAM team to ensure models and drawings are converted accurately and align with customer requirements.
- Ensure all manufacturing follows strict ISO 9001 quality procedures
- Drive continuous improvement in processes, tooling, setup and project timings.
- Collaborate with the supply chain to deliver and obtain new work packages.
- Ensure health and safety compliance across the business
- Support customer communication regarding technical queries, progress and inspections.
- Lead quotes for projects and work with the finance department ensuring smooth and effective communication across all departments.

Minimum essential qualifications/ experience and role requirements:

- Proven experience managing a machine shop or precision engineering environment
- Strong knowledge of CNC Milling and Turning Operations
- Experience working with CAD/CAM software
- Excellent leadership, communication and organisational skills
- Ability to interpret drawings and technical requirements
- Understanding of ISO 9001 quality systems
